

Issue List

Add-on / TE	Issue	Change Required
Folder image	<p>Problem 1:                      - 10 or more non-image items are sequenced before an image file in the selected folder, and                      - "Expanded" is NOT opted for,                      &gt; This add-on cannot find that image file.</p> <p>Problem 2:                      - 10 or more non-image items are sequenced before an image file in the selected folder, and                      - "Expanded" is opted for, and                      - a sub-folder contains an image file                      &gt; The image file in the sub-folder is shown unexpectedly. TE should look for any image file in the selected folder before looking into sub-folders.</p> <p>Problem 3:                      "Number of items" option seems to be a depth of sub-folders to look into when "Expanded" is opted for, but does not work in this way.</p> <p>Problem 4:                      - "Expanded" is opted for, and                      - select a folder storing thousands of non-image and image files (organized into different sub-folders),                      &gt; TE may freeze for a long time. Although the add-on seems to be able to show a progress window, the latter does not show.</p>	Fix
