

Check Box add-on v1.04 problem (revised)

Problem Example 1 (details view)

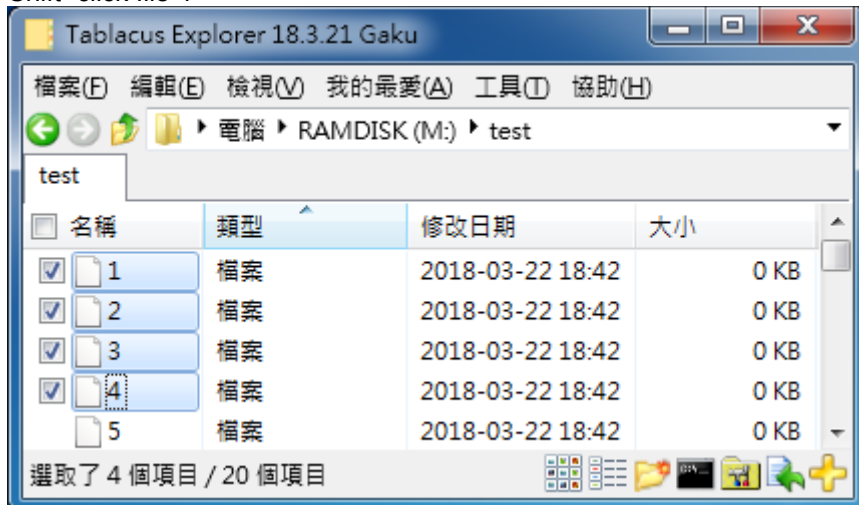

Click the check box to select file 2

Move the mouse pointer to file 4

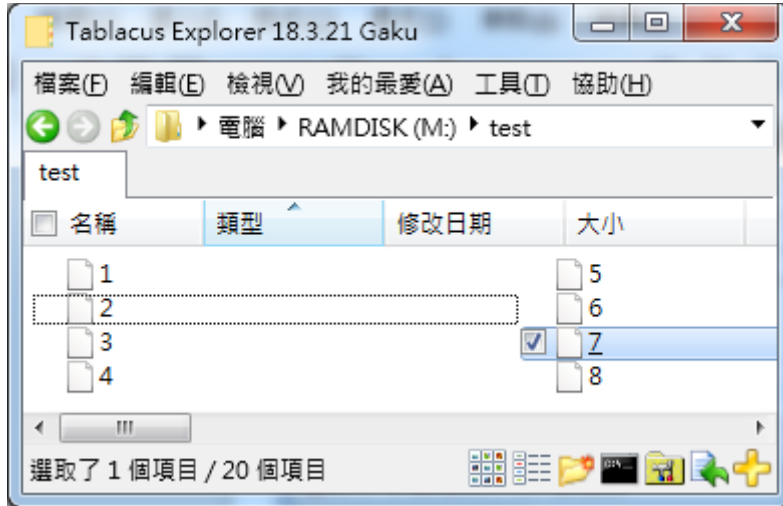

Shift+click file 4

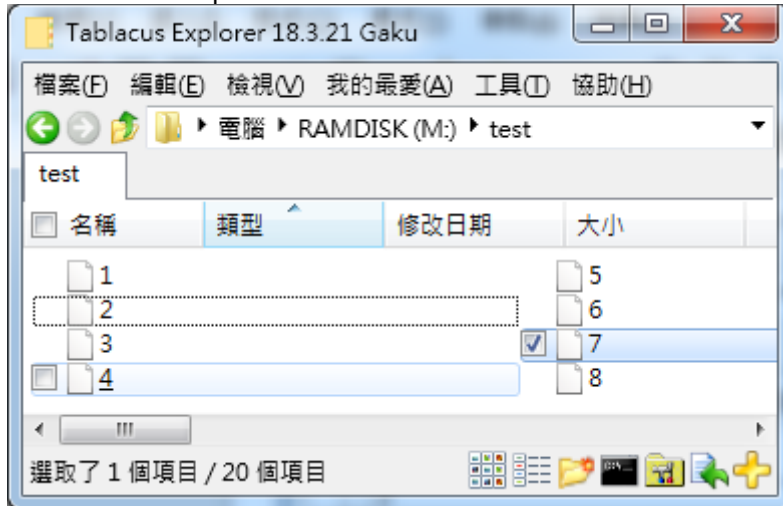

I expect to select file 2 to 4, but file 1 is unexpectedly selected.

Problem Example 2 (list view)

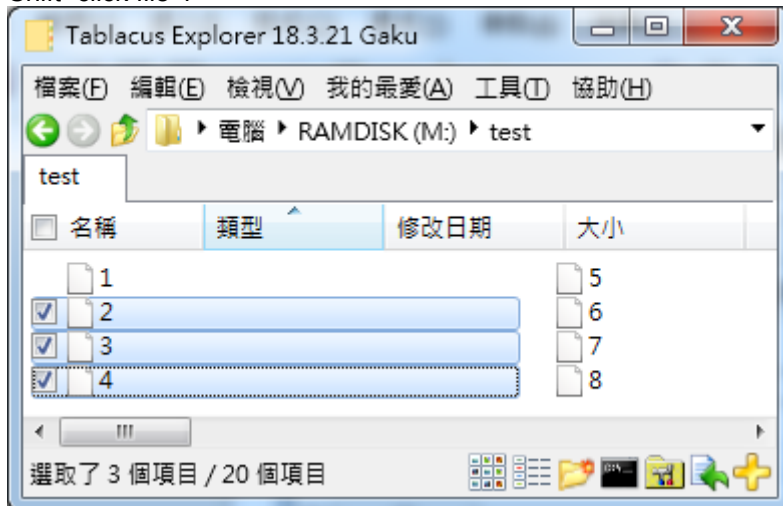

Click the check box to select file 7

Move the mouse pointer to file 4

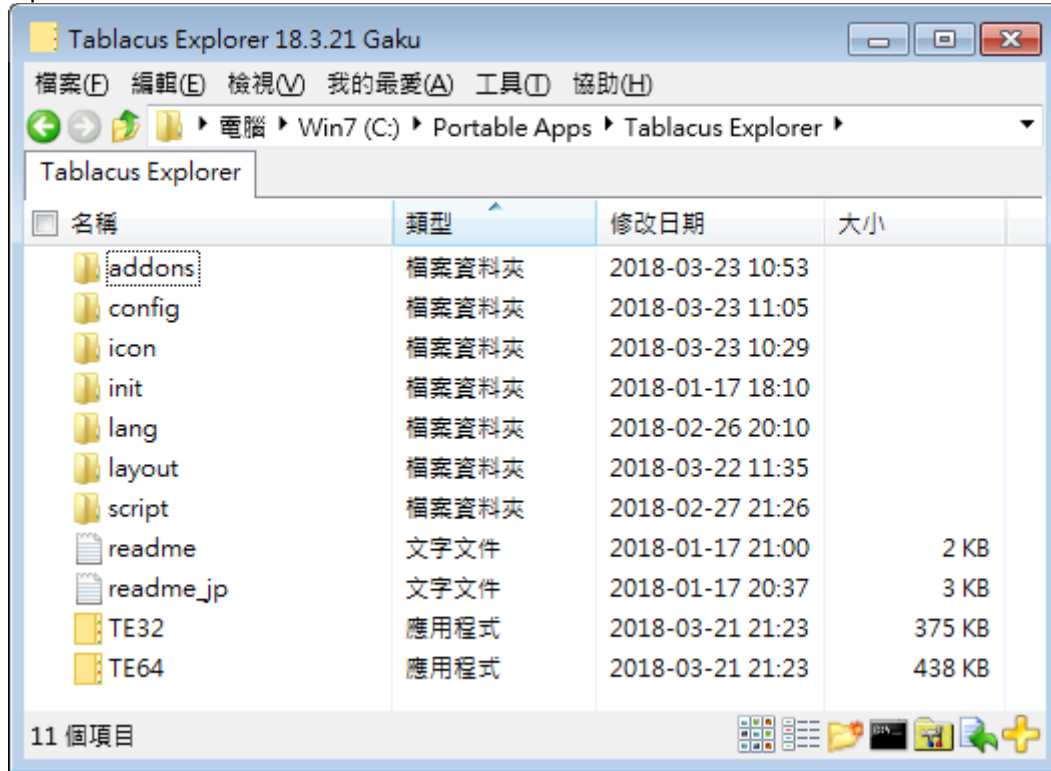

Shift+click file 4

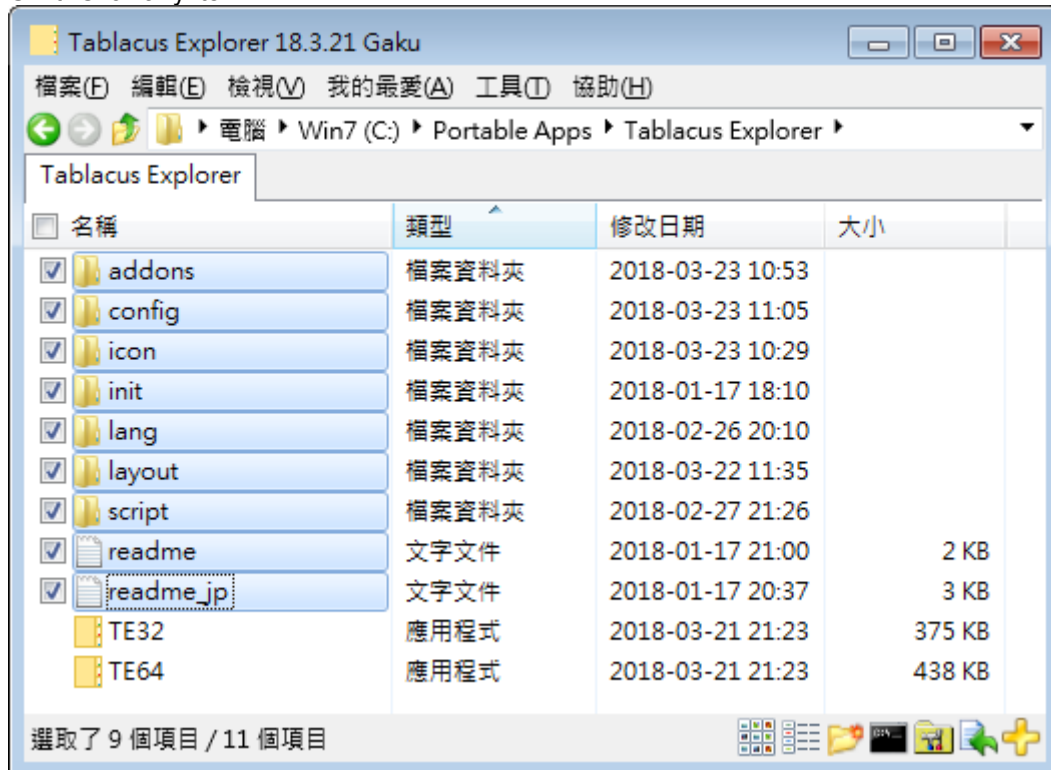

I expect to select file 4 to 7, but file 2 and 3 are unexpectedly selected.

Special Case 1 (no problem)

Open a folder

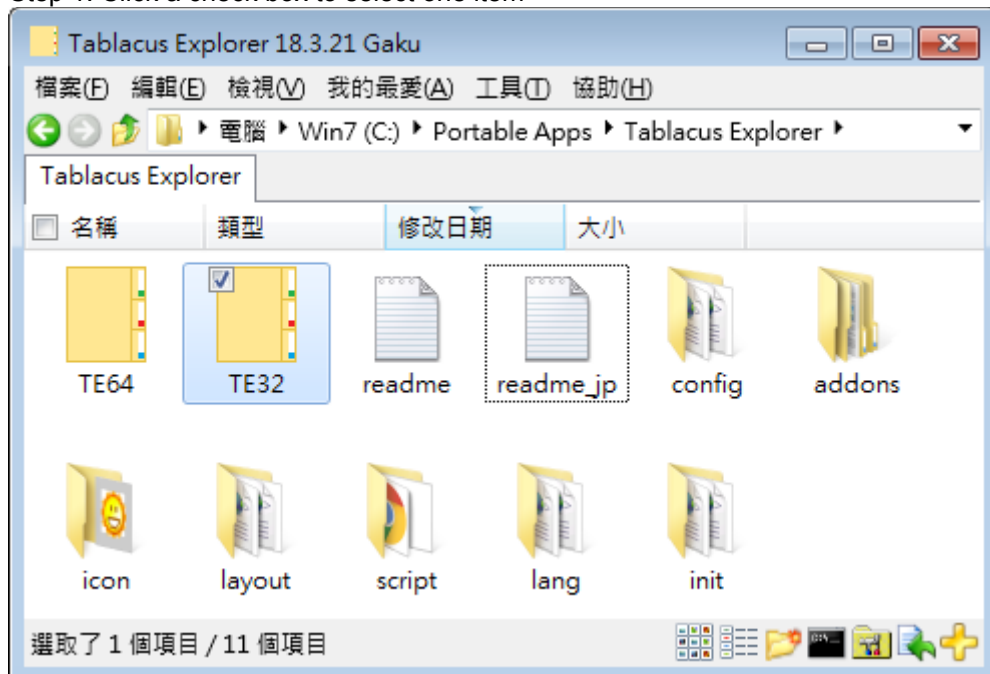

Shift+Click any item

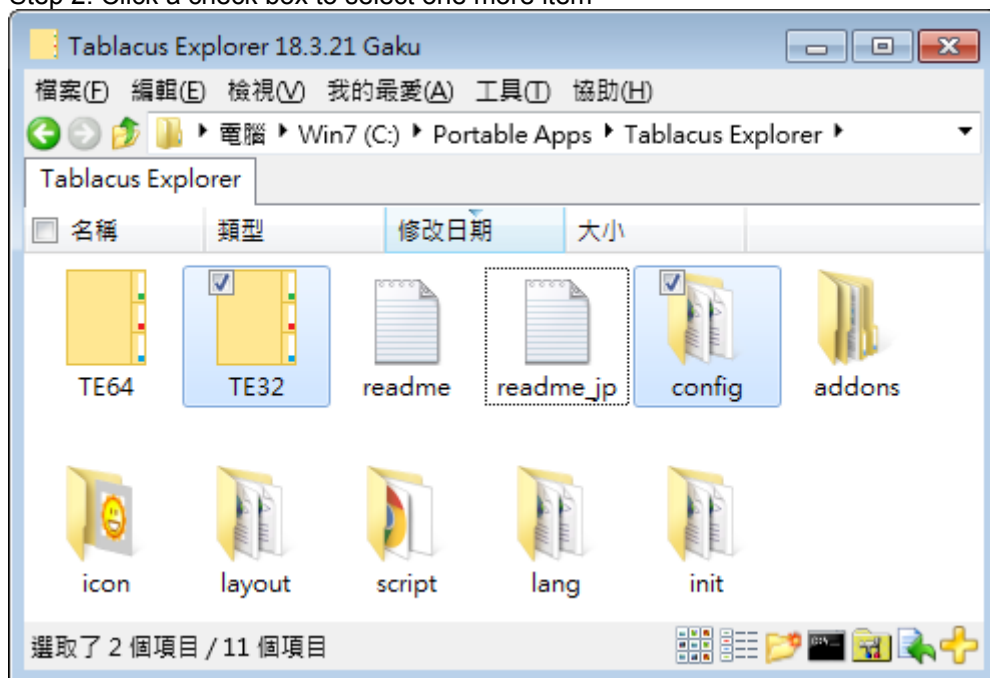

The first item to the Shift-clicked item are selected. This is the same as Windows. No problem.

Special Case 2 (problem)

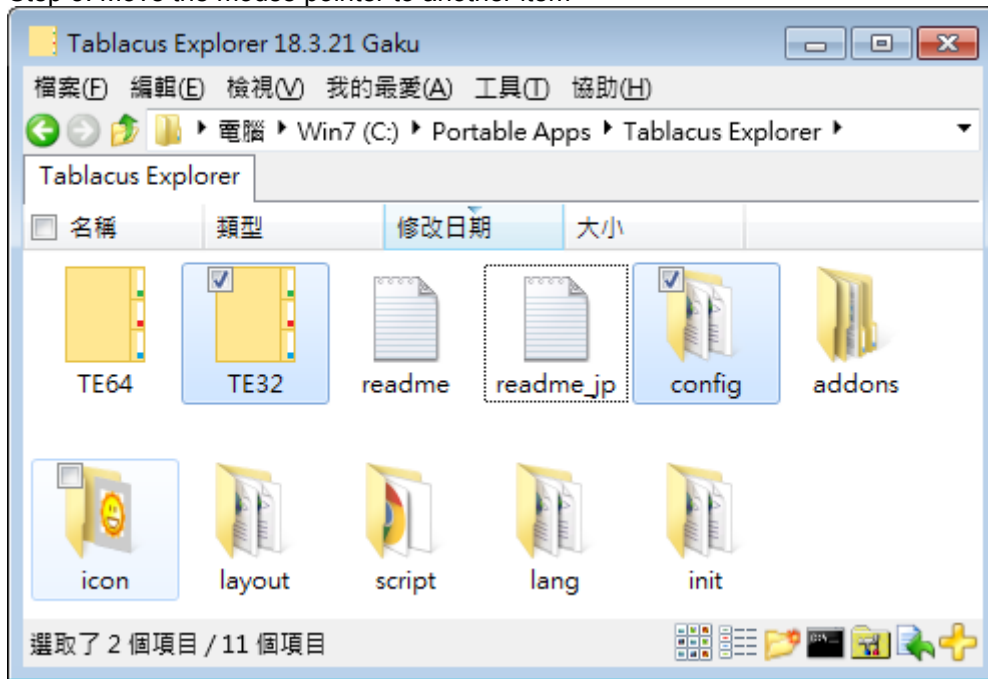

Step 1: Click a check box to select one item

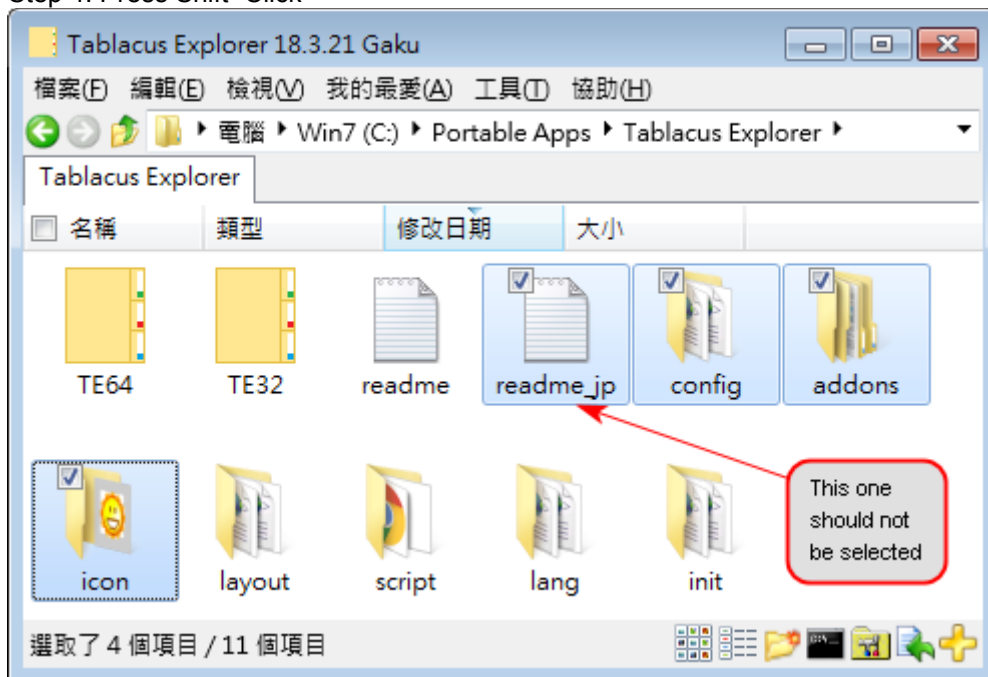

Step 2: Click a check box to select one more item

Step 3: Move the mouse pointer to another item

Step 4: Press Shift+Click

An item not in the selection range is selected.

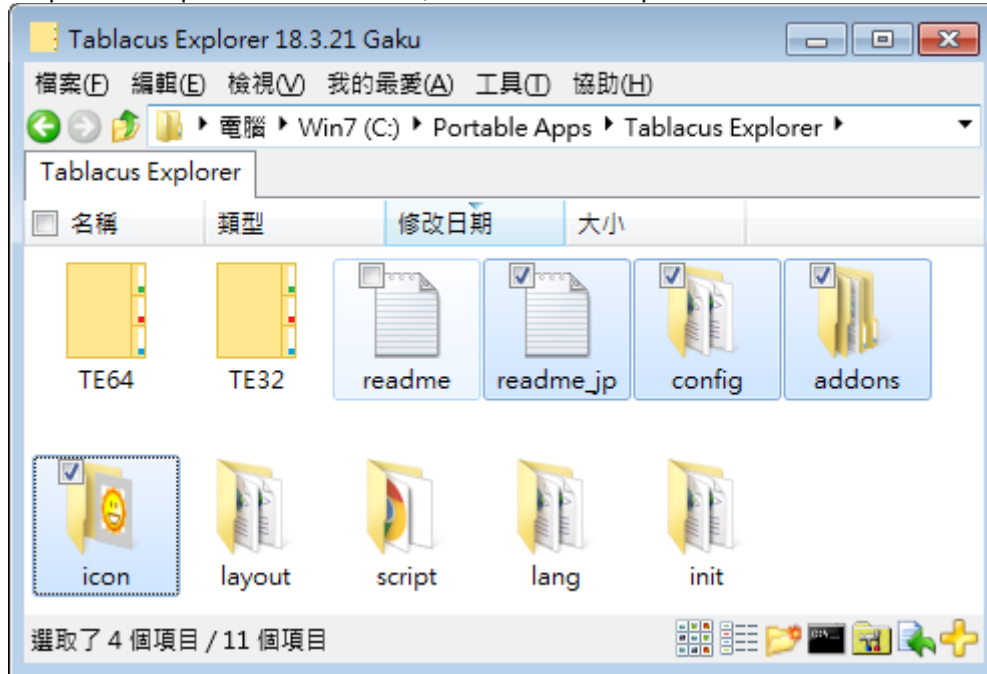

Windows' way of the selection range is:

- from the item with its check box clicked last (Step 2)
- to the item Shift+Clicked (Step 4)
- according to the currently viewing sequence

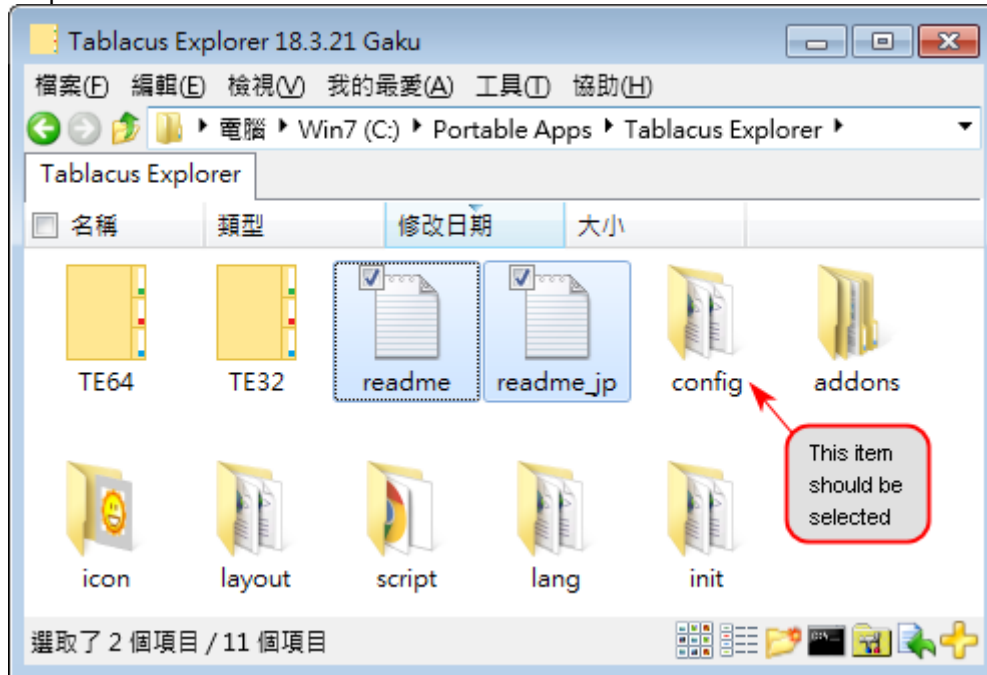

And ignore whatever selected before Step 2.

Special Case 3 (problem)

Step 1: After Special Case 2 above, move the mouse pointer to another item.

Step 2: Press Shift+Click

An item in the selection range is not selected.

The same Windows' way of the selection range should be applied:
- from the item with its check box clicked last (Special Case Step 2)
- to the item Shift+Clicked (Step 2)
- according to the currently viewing sequence
And ignore whatever previously selected.
