Multiple panes with Tab groups problems

Problem 1

Before enabling "Tab groups"

Choose "Tools > Add-ons" and enable "Tab groups"

The breadcrumbs address bar incorrectly shows the address of the current tab of an inactive pane.

Problem 2

Just after the above, TE cannot activate the inactive pane, e.g.

- Click the tab area
- Click any tab
- Click the file list
- Hover the mouse pointer on any item of the file list
- Click the inner address bar

unless a user does anything on the active pane first

Problem 3

Problem 2 also occurs then.

(If you cannot re-generate Problem 1 or 3, switch the active pane and re-try)
