Add-on / TE	Category	Issue	Change Required	Priority
Check box	Select	<when "all"="" box="" check="" is="" ticked=""> "Click an empty space of a file list to deselect all items" does not work when 2 or more items are selected</when>	Fix	3-Medium
Startup settings	Startup and Settings	Skip the action if the user presses Shift when TE starts, as if this add-on were not enabled. Useful in 2 situations:1. The user may want to skip it occasionally.2. A a problem has occurred during the action.	Enhancement	3-Medium
Startup settings	Startup and Settings	When the add-on is configured to "Load layout": If the layout file is later on be moved away or be deleted, TE shows a "TypeError" when it starts. It will be better if TE can: - skip loading the file, and - prompt the user " <filename> is not found", and - restore the panes and tabs of last session (if this is difficult to do, load a single pane with a default tab instead)</filename>	Fix	2-High
