

Issue List

Add-on / TE	Category	Issue	Change Required	Priority
Folder settings	Folder View	This add-on should not produce any sorting instruction (FV.SortColumn or FV.SortColumns) in "Options" for any result list, regardless of any current sorting order. Because: 1. When most result lists show, they do not follow the sorting order. 2. This instruction causes a misleading sorting indication be displayed in a column heading.	Fix	3-Medium
Folder settings	Folder View	Produce a grouping instruction (FV.GroupBy) in "Options" if the current tab is using. But do not do this for any result list (because FV.GroupBy for a result list does not work very well currently, and no need for it)	Improvement	3-Medium
Tab groups	Workspaces	1. Right click an inactive workspace tab, then 2. Do any one of the followings: - press Esc - choose "Rename", then press Esc or click Cancel - choose "Close tab", then press Esc or click Cancel - choose "Close other tabs", then press Esc or click Cancel - choose "Load", then press Esc or click Cancel - choose "Save" (then do whatever) then 3. Click the inactive workspace tab Cannot switch to the workspace [This problem appears starting from version 1.21 which has a fix about double-click. If this problem is difficult to fix, please revert to version 1.20 and just remove that double-click ability. Users can still choose the rename function from the context menu by 2 clicks (1 right + 1 left) anyway.]	Fix	3-Medium
