Add-on / TE	Category	Issue	Change Required	Priority
Multi process	File Operations	If audio file type is MP3 or MP4, use <audio> HTML tag to play the file; otherwise use <embed> (the current method). Then even when Windows Media Player is disabled, a user still can use this function (though limited to MP3 and MP4).	Enhancement	3-Medium
Folder settings	Folder View	Produce a grouping instruction (FV.GroupBy) in "Options" if the current tab is using grouping. In addition to folders, do this to the following result lists too: - History - Flat - Windows Search - Everything - Find Files - Empty folder But do not do this for the followings (unless a problem can be easily fixed: the list will become blank before a user press F5): - Speed Dial - Badge - Label - Clip Folder	Improvement	3-Medium

		If audio file type is MP3 or MP4, use <audio> HTML tag to play the file; otherwise use <embed> (the current method). Then even when Windows Media Player is disabled, a user still can use this function (though limited to MP3 and MP4).		
		Produce a grouping instruction (FV.GroupBy) in "Options" if the current tab is using grouping.
