

Issue List

Add-on / TE	Category	Issue	Change Required	Priority
Folder settings	Folder View	Produce a grouping instruction (FV.GroupBy) in "Options" if the current tab is using grouping.	Improvement	3-Medium
Speed Dial Badge Label Clip Folder	Folder View	If a sorting instruction is specified in "Folder Settings" for such a result list: 1. The list can be sorted but the indication on the sort column disappears. 2. Pressing F5 the first time, the list incorrectly becomes empty.  (Note that "Folder Settings" can generate a sorting instruction for these 4 types of result lists) <i>[TE 18.4.2 and earlier does not have this problem]</i>	Fix	3-Medium
TE	Panes	Do the followings on an inactive pane. It can be activated but users need to wait for a while. <b>The activation should be instant.</b> 1. hover the mouse pointer on a file list and scroll 2. click the tab area 3. click the file list 4. use "Switch to next pane" add-on to switch panes <i>[TE 18.3.30 and earlier does not have this problem]</i>	Fix	2-High
TE	Panes	<u>Hover the mouse pointer on an item in a file list of an inactive pane.</u> The pane can be activated but users need to wait for a while. It is a good idea to have such a grace period, so that a pane will not be accidentally activated when a mouse pointer just flies over. However currently this period is too long for some users. I suggest to let user customize this period (in milliseconds) somewhere in "Tools > Options". Suggested default is around 100 to 200.	Improvement	2-High
