

## TE 18.4.10 re-open result list problems

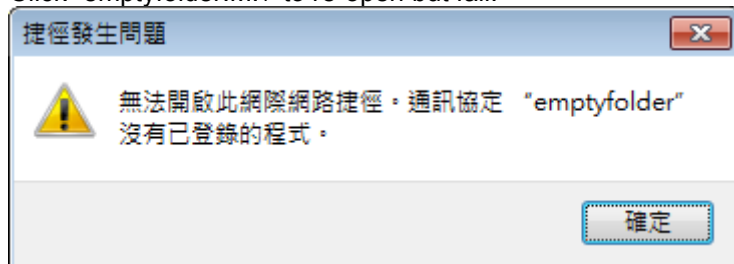

Some result lists are recorded in History.

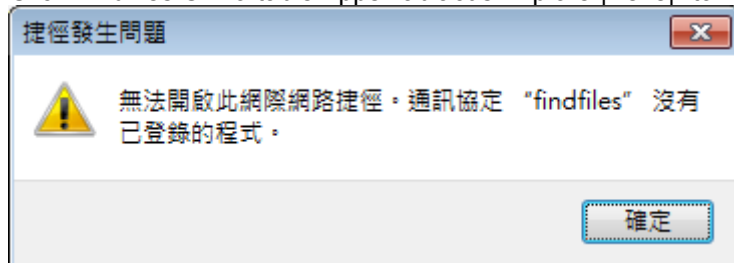

Click "flat:m:\> to re-open but fail.

Click "emptyfolder:M:\> to re-open but fail.

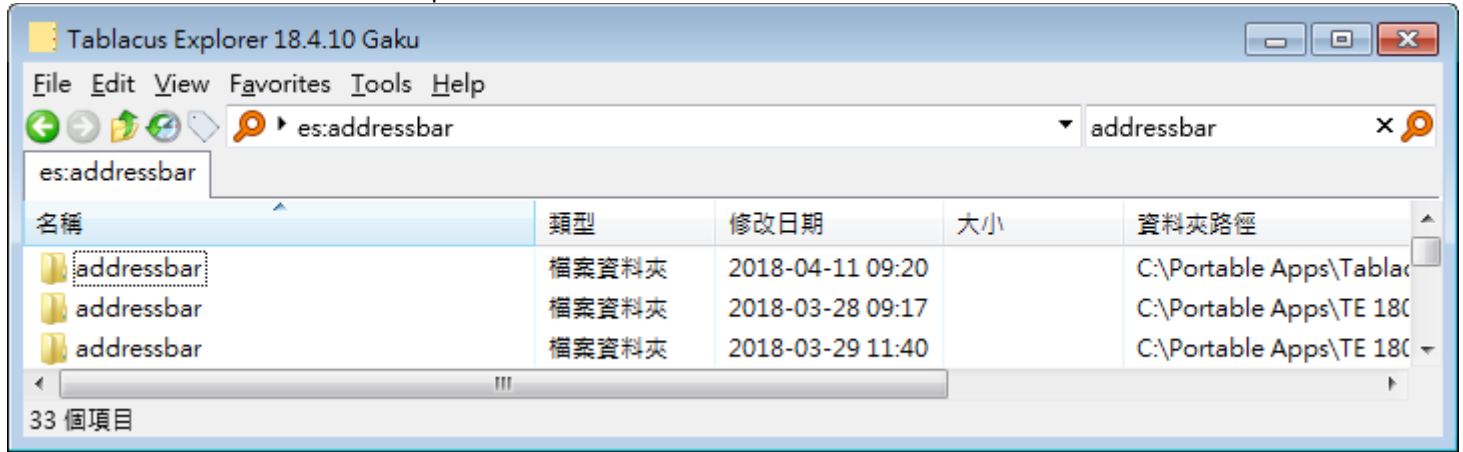

Click "findfiles:C:\Portable Apps\Tablacus Explorer|\*.exe|" to re-open but fail.

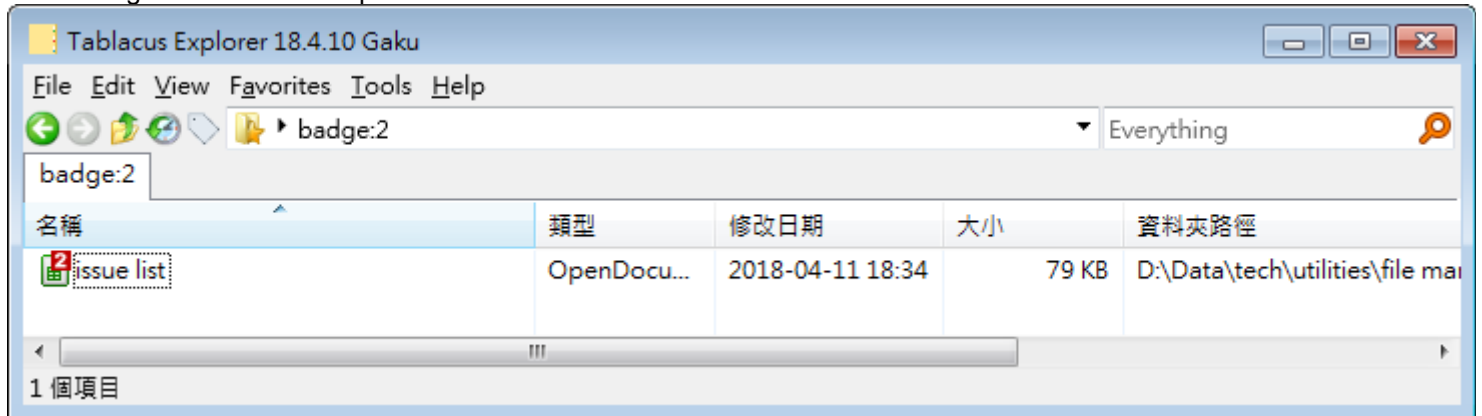

On the contrary:

Click "es:addressbar". It can be re-opened.

Click "badge:2". It can be re-opened.

I have checked that they are all enabled.
