# 1 Translation location not found ???
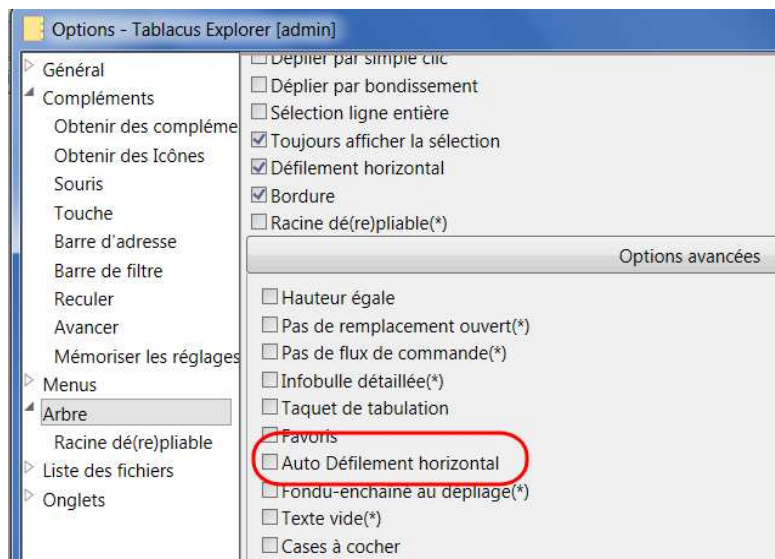

Warning : Even when switching TE to the downloaded en.xml, these displays stay in French??

View → Choose Details → pop-up window: NomDossier should be "Nom de dossier".

I'm perhaps a moron ☺ but I can't locate where the hell are stored "Choisir les détails" and "NomDossier" translation fields …
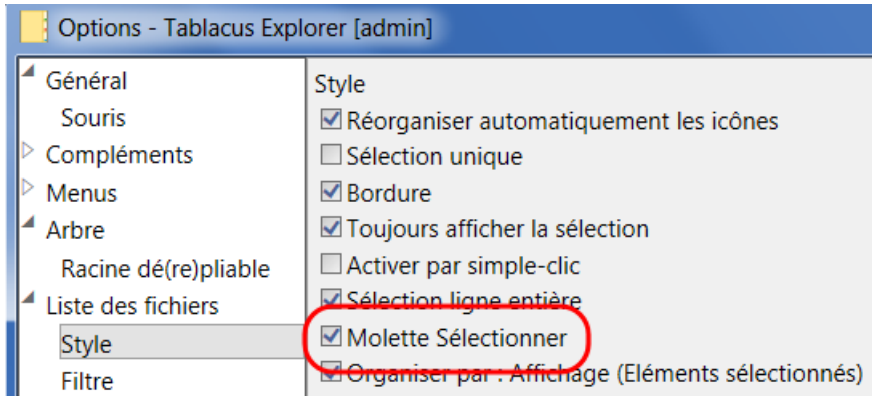

2 Options→ Tree → Advanced options

Wrong concatenation of ODS lines content: #220 (Défilement horizontal <-> Horizontal scroll) and #230 (Auto).

In French, should be "Auto-défilement horizontal".

3   Same problem in: *Options → File list → Style*

Wrong concatenation of ODS lines content: # 52 and 115.

In French, should be "Sélection par clic molette" (or similar)

4   My installed add-ons, for your info
